Peter B. Kayne's inspiring story has lost none of its relevance. By applying the ageless lessons of The Go-Getter employees and entrepreneurs can learn to be in command of their careers and maintain their get-up-and-go.

The Go-To Guy Aug 17 2021 In this book, Edward Deeb, the founder of Michigan Food and Beverage Association, Michigan Business and Professional Association, Michigan Youth Appreciation Foundation, and Metro Detroit Youth Day, tells the story of his life and how he became a peacemaker, troubleshooter, youth advocate, and business leader in the community. He explains how to be successful in business and in life through his many interesting experiences. Ed has coined the phrase "Flowers for the Living" to honor people while they are alive instead of when they have passed. One of his favorite sayings is "Don't go where the path may lead, go instead where there is no path, and leave a trail." After you read this book, you will agree that Ed Deeb is "The Go-To Guy" if you want someone to resolve problems and create peace and tranquility not only in business but in the community-at-large.

The Go-Giver Jan 10 2021 'Most people just laugh when they hear that the secret to success is giving . . . Then again, most people are nowhere near as successful as they wish they were.' The Go-Giver tells the story of an ambitious young man named Joe who yearns for success. Joe is a true go-getter, though sometimes he feels as if the harder and faster he works, the further away his goals seem to be. One day, desperate to land a key sale at the end of a bad quarter, he seeks advice from the

enigmatic Pindar, a legendary consultant referred to by many devotees simply as the Chairman. Over the next week, Pindar introduces Joe to a series of successful 'go-givers' who teach him how to open himself up to the power of giving. Joe learns that changing his focus from getting to giving - putting others' interests first and continually adding value to their lives - ultimately leads to unexpected results. [The Go Programming Language](#) Sep 17 2021 The Go Programming Language is the authoritative resource for any programmer who wants to learn Go. It shows how to write clear and idiomatic Go to solve real-world problems. The book does not assume prior knowledge of Go nor experience with any specific language, so you'll find it accessible whether you're most comfortable with JavaScript, Ruby, Python, Java, or C++. The first chapter is a tutorial on the basic concepts of Go, introduced through programs for file I/O and text processing, simple graphics, and web clients and servers. Early chapters cover the structural elements of Go programs: syntax, control flow, data types, and the organization of a program into packages, files, and functions. The examples illustrate many packages from the standard library and show how to create new ones of your own. Later chapters explain the package mechanism in more detail, and how to build, test, and maintain projects using the go tool. The chapters on methods and interfaces introduce Go's unconventional approach to object-oriented programming, in which methods can be declared on any type and interfaces are implicitly satisfied. They explain the key principles of encapsulation, composition, and substitutability using realistic examples. Two chapters on concurrency present in-depth approaches to this increasingly important topic. The first, which covers the basic mechanisms of goroutines and channels, illustrates the style known as communicating sequential processes for which Go is renowned. The second covers more traditional aspects of concurrency with shared variables. These chapters provide a solid

foundation for programmers encountering concurrency for the first time. The final two chapters explore lower-level features of Go. One covers the art of metaprogramming using reflection. The other shows how to use the unsafe package to step outside the type system for special situations, and how to use the cgo tool to create Go bindings for C libraries. The book features hundreds of interesting and practical examples of well-written Go code that cover the whole language, its most important packages, and a wide range of applications. Each chapter has exercises to test your understanding and explore extensions and alternatives. Source code is freely available for download from <http://gopl.io/> and may be conveniently fetched, built, and installed using the go get command.

The Go-Between Apr 12 2021 'Full of love, wisdom and yearning' Kit de Waal A coming-of-age story set in Birmingham in the 1980s and 1990s, *The Go-Between* opens a window into a closed migrant community living in a red-light district on the wrong side of the tracks. The adult world is seen through Osman's eyes as a child: his own devout migrant Muslim patriarchal community, with its divide between the world of men and women, living cheek-by-jowl with parallel migrant communities. Alternative masculinities compete with strict gender roles, and female erasure and honour-based violence are committed, even as empowering female friendships prevail. The stories Osman tells, some fantastical and humorous, others melancholy and even harrowing, take us from the Birmingham of Osman's childhood to the banks of the river Kabul and the river Indus, and, eventually, to the London of his teenage years. Osman weaves in and out of these worlds, struggling with the dual burdens of racism and community expectations, as he is forced to realise it is no longer possible to exist in the spaces in between.

The Dead Go to Seattle May 26 2022 On an Alaskan island beset by climate change, a Native seeks to preserve history: "An enthralling, engaging, mind-bending, time-bending story collection." —Garth Stein, New York Times—bestselling author of *The Art of Racing in the Rain* Tova Agard's world is literally falling apart: she's just been disowned by her father in a violent confrontation over her sexuality, and climate change is about to wreak havoc on the world around her. In the midst of catastrophe, Tova meets Smithsonian Institute ethnologist John Swanton on an Alaskan-ferry time machine, trapping Swanton on Tova's small hometown of Wrangell Island. Tova convinces Swanton that the island's contemporary stories are worth collecting despite their strangeness: in Tova's oral traditions, a woman becomes a bear, a man marries trees, a UFO hunts deer, and the dead go to Seattle. These forty-three linked tales in the story-cycle are not stories that the Smithsonian intended to collect, but by the time all the tales are told, their reconstruction of history will make a greater impact on the world around them than either Tova or Swanton could have ever imagined. "Cleverly framed, these stories capture a rich island community that is

steeped in oral traditions . . . a collection that rewards rereading and rumination.” —Foreword
