Anthony Hewitson (1836-1912) was a typical Victorian journalist, working in one of the largest sectors of the periodical press, provincial newspapers. His diaries, written between 1862 and 1912, lift the veil of anonymity hiding the people, processes and networks involved in the creation of Victorian newspapers. They also tell us about Victorian fatherhood, family life, and the culture of a Victorian town. Diaries of nineteenth-century provincial journalists are extremely rare. Anthony Hewitson went from printer's apprentice to newspaper reporter and eventually editor of his own paper. Every night he jotted down the day's doings, his thoughts

and feelings. The diaries are a lively account of the reporter's daily round, covering meetings and court cases, hunting for gossip or attending public executions and variety shows, in and around Preston, Lancashire. Andrew Hobbs's introduction and footnotes provide background and analysis of these valuable documents. This full scholarly edition offers a wealth of new information about reporting, freelancing, sub-editing, newspaper ownership and publishing, and illuminates aspects of Victorian periodicals and culture extending far beyond provincial newspapers. The Diaries of Anthony Hewitson, Provincial Journalist are an indispensable research tool for local and regional historians, as well as social and political historians with an interest in Victorian studies and the media. They are also illuminating for anyone interested in nineteenth-century social and cultural history. This book is part of a two-volume work that constitutes the refereed proceedings of the 11th IFIP TC13 International Conference on Human-Computer Interaction, INTERACT 2007, held in Rio de Janeiro, Brazil in September 2007. It covers social computing, UI prototyping, user centered design methods and techniques, intelligent user interfaces, accessibility, designing for multiples devices, affective computing, 3D interaction and 3D interfaces, as well evaluation methods. This volume covers the land property and deeds with the owners listed in alphabetical order.

Proceedings of the 22d-33d annual conference of the Library Association in v. 1-12; proceedings of the 34th-44th, 47th-57th annual conference issued as a supplement to v. 13-23, new ser. v. 3-ser. 4, v. 1. This book focuses on emerging issues in usability, interface design, human-computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interaction with products, services and systems, and focuses on finding effective approaches for improving user experience. It also discusses key issues in designing and providing assistive devices and services to individuals with disabilities or impairment, to assist mobility, communication, positioning, environmental control and daily living. The book covers modelling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Virtual reality, digital environments, heuristic evaluation and forms of device interface feedback of (e.g. visual and haptic) are also among the topics covered.

Based on the both the AHFE 2019 Conference on Usability & User Experience and the AHFE 2019 Conference on Human Factors and Assistive Technology, held on July 24-28, 2019, Washington D.C., USA, this book reports on cutting-edge findings, research methods and user-centred evaluation approaches. This book contains a selection of the best papers from WEBIST 2009 (the 5th International Conference on Web Information Systems and Technologies), held in Lisbon, Portugal, in 2009, organized by the Institute for Systems and Technologies of Information, Control and Communication (INSTICC), in collaboration with ACM SIGMIS and co-sponsored

by the Workflow Management Coalition (WFMC). The purpose of the WEBIST series of conferences is to bring together researchers, engineers and practitioners interested in the technological advances and business applications of Web-based information systems. The conference has four main tracks, covering different aspects of Web information systems, including Internet Technology, Web Interfaces and Applications, Society, e-Communities, e-Business and e-Government. WEBIST 2009 received 203 paper submissions from 47 countries on all continents. A double-blind review process was enforced, with the help of more than 150 experts from the International Program Committee; each of them specialized in one of the main conference topic areas. After reviewing, 28 papers were selected to be published and presented as full papers and 44 additional papers, describing work-in-progress, published and presented as short papers. Furthermore, 35 papers were presented as posters. The full-paper acceptance ratio was 13%, and the total oral paper acceptance ratio was 36%. Therefore, we hope that you find the papers included in this book interesting, and we trust they may represent a helpful reference for all those who need to address any of the research areas mentioned above.

January 2010
José Cordeiro Joaquim Filipe

This is the third volume of our series Progress in Anti-Cancer Chemotherapy. Following the strategy of the first two volumes, it covers selected aspects of progress in this fast moving field of Oncology, with contributions from some of the world's best known leaders in both basic and clinical research. This year we focused on seven areas: Three prominent Clinical investigators reviewed conceptual advances in cancer research. Dr Buzdar presented a history and overview of the protection of human subjects who participate in clinical research, and the mechanisms developed to assure the ethical conduct of research on human beings. Frei reviewed an exciting and rapidly moving area of chemotherapy of solid tumors, including a cogent discussion of the issues related to dose-intensification. Fisher summarized conceptual advances in our therapeutic approach to breast cancer and the paradigm shifts that lead us to our current management strategies. From this summary he projected breast cancer research into the future, a daunting task under any circumstance. Fundamental research in cancer biology has been responsible for our improved understanding of the development and progression of malignant disease. Such understanding will lead to improved diagnosis, therapy, and eventually, prevention. Isaacs reviews the area of hereditary breast cancer, a topic undergoing rapid transformation and with multiple implications in the daily practice of medicine. Fidler, an international expert in metastasis research reviews the potential utility of angiogenesis inhibitors in research and the therapeutic ramifications. Contains opinions and comment on other currently published newspapers and magazines, a selection of poetry, essays, historical events, voyages, news (foreign and domestic) including news of North

America, a register of the month's new publications, a calendar of forthcoming trade fairs, a summary of monthly events, vital statistics (births, deaths, marriages), preferments, commodity prices. Samuel Johnson contributed parliamentary reports as "Debates of the Senate of Magna Lilliputia." The four volume set LNAI 3681, LNAI 3682, LNAI 3683, and LNAI 3684 constitute the refereed proceedings of the 9th International Conference on Knowledge-Based Intelligent Information and Engineering Systems, KES 2005, held in Melbourne, Australia in September 2005. The 716 revised papers presented were carefully reviewed and selected from nearly 1400 submissions. The papers present a wealth of original research results from the field of intelligent information processing in the broadest sense; topics covered in the fourth volume are innovations in intelligent systems and their applications, data mining and soft computing applications, skill acquisition and ubiquitous human computer interaction, soft computing and their applications, agent-based workflows, knowledge sharing and reuse, multi-media authentication and watermarking applications, knowledge and engineering techniques for spatio-temporal applications, intelligent data analysis and applications, creativity support environment and its social applications, collective intelligence, computational methods for intelligent neuro-fuzzy applications, evolutionary and self-organizing sensors, actuators and processing hardware, knowledge based systems for e-business and e-learning, multi-agent systems and evolutionary computing, ubiquitous pattern recognition, neural networks for data mining, and knowledge-based technology in crime matching, modelling and prediction. Using the available systematic reviews and Standard Options Recommendations (SORs) which are evidence-based treatment recommendations, Evidence-based Pediatric Oncology is a ground breaking text on the management of childhood cancers. Covering all tumour types occurring in children and young adults, it provides systematic reviews with recommendations for optimum treatments for childhood cancer. Offering reviews and commentaries from leading internationally recognised paediatric oncologists, this fully revised second edition now covers significant randomised controlled trials. Special Agent Dodge is on the prowl, hunting down a madman who is out to harm the woman he loves. Only one thing can break his focus, which is the possibility that he's too late to save her. When that proof is thrown at his very feet, Dodge's world is thrown into darkness. Driven by anger and heartbreak, he continues his mission to expose Holly's killers...only to find out she may not be dead after all. With time running out, he embarks on a journey to find her before the wrong people do-and to claim his rightful place by her side. Book 2 of J. A. Dennam's Captive series Melanie Parker's life takes a gut-wrenching turn when she wakes up in a crumbling, unfamiliar environment. Even worse, her small child is in the arms of a certifiable killer, but Rena Hellberg isn't the only immediate threat. Melanie's abductor lurks

in the shadows, a quiet, hooded stranger who's calling the shots. When she refuses to play the meek hostage, he reveals his darkest secrets in order to gain her cooperation. Though he can barely trust himself, he can't deny his feelings for a woman he should have left alone. It wasn't his intention to bring her into a world he's trying to break free of, but he refuses to let it destroy her. The formidable group of enforcers who took him and made him one of their own won't tolerate rebellion of any kind. But they've never dealt with such a stubborn recruit...or one with so much to live for. A career woman to a fault, Brooke Monroe vows to earn back the graphic art business her father sold, robbing her of her birthright and costing an office-full of employees their jobs. The arrogant team of outsiders appears to have no sympathy, a fact that sets her blood boiling. As one of the only survivors of the takeover, Brooke finds herself face-to-face with the devilishly handsome Ethan Wolf as they vie for the position of Vice President of Monroe Graphics. Ethan is ready for Brooke and her amusing attempt to emerge the victor: the woman's stiff exterior and fiery green eyes both fascinate and infuriate him like no other. As the sparks of rivalry fly, so begins a reluctant attraction between the two VP candidates. When an accidental encounter in the darkroom reveals an undeniable chemistry between them, Brooke and Ethan's fight turns dirty and detours to the bedroom. Once the clothes come off, their biggest challenge is keeping sex out of the workplace...and keeping their feelings at bay until after the competition. But when a corporate leak is discovered and Brooke is blamed as the obvious culprit, will Ethan trust her enough to believe her claims of innocence? Or will Brooke's chance at love and her father's company be forever out of reach? a great resource anywhere you go; it is an easy tool that has just the words you want and need! The entire dictionary is an alphabetical list of Law words with definitions. This eBook is an easy-to-understand guide to Law terms for anyone anyways at any time. suurepärane ressurss kus iganes sa lähed; see on lihtsalt tööriist, millel on just sõnad, mida soovite ja vajate! Kogu sõnastik on tähemärkide tähestikuline loend. See e-raamat on lihtsalt seadusega ette nähtud juhised kellelegi igal ajal igal ajal.
