multimedia writers' studio. Focusing on literacy
processes, the book emphasizes the fluid and sometimes
unintentional ways multimodal artifacts come into being
through intra-actions with human and nonhuman materials.
Because these theories emphasize the unplanned,
nonlinear aspects of literacy, the authors demonstrate

of unscripted intra-actions they allow for more
authentic learning.

iPads in the Early Years Oct 07 2020 Digital devices, such as smart phones and tablet computers, are becoming commonplace in young children's lives for play, entertainment, learning and communication. Recently, there has been a great deal of focus on the educational potential of these devices in both formal and informal educational settings. There is now an abundance of educational 'apps' available to children, parents, and

teachers, which claim to enhance children's early literacy and numeracy development, but to date, there has been very little formal investigation of the educational potential of these devices. This book discusses the impact on children's learning when iPads were introduced in three very different early years settings in Brisbane, Australia. It outlines how researchers worked with pre-school teachers and parents to explore how iPads can assist with letter and word recognition, the development of oral literacy and digital literacies and talk around play. Chapters consider the possibilities for using iPads for creativity and arts education through photography, storytelling, drawing, music creation and audio recording, and critically examine the literacies enabled by educational software available on iPads, and the relationship between digital play and literacy development. iPads in the Early Years provides exciting insights into children's digital culture and learning in the age of the iPad. It will be key reading for researchers, research students and teacher educators focusing on the early years, as well as those with an interest in the role of ICTS, and particularly tablet computers, in education.
