Writing Across the Disciplines Jun 25 2022 Young and Fulwiler bring together eighteen essays from writing-across-the-curriculum participants and program staff.

Fear Mar 11 2021 This volume provides a cross-disciplinary examination of fear, that most unruly of our emotions, by offering a broad survey of the psychological, biological, and philosophical basis of fear in historical and contemporary contexts. The contributors, leading figures in clinical psychology, neuroscience, the social sciences, and the humanities, consider categories of intentionality, temporality, admixture, spectacle, and politics in evaluating conceptions of fear. Individual chapters treat manifestations of fear in the mass panic of the stock market crash of 1929, as spectacle in warfare and in horror films, and as a political tool to justify security measures in the wake of terrorist acts. They also describe the biological and evolutionary roots of fear, fear as innate versus learned behavior in both humans and animals, and conceptions of human “passions” and their self-mastery from late antiquity to the early modern era. Additionally, the contributors examine theories of intentional and non-intentional reactivity, the process of fear-memory coding, and contemporary psychology’s emphasis on anxiety disorders. Overall, the authors point to fear as a dense and variable web of responses to external and internal stimuli. Our thinking about these reactions is just as complex. In response, this volume opens a dialogue between science and the humanities to afford a more complete view of an emotion that has shaped human behavior since time immemorial.

Reading Across the Disciplines May 13 2021 This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Reading Across the Disciplines provides concise reading skill instruction complemented by discipline-specific reading strategies. These discipline-specific reading skills offer tips for reading and thinking within the popular disciplines, so students learn content as well as strategy.

Reading Across the Disciplines Mar 23 2022 Reading Across the Disciplines provides reading strategies for a variety of academic

disciplines (more than any other available text), concise skill instruction, and extensive practice to improve college-level reading and thinking skills. Reading Across the Disciplines is organized into three parts for flexibility and ease-of-use. Part One presents a brief skill introduction (in handbook format) introducing students to essential vocabulary, comprehension, critical reading, and reading rate skills. Part Two has twelve chapters, each containing three readings representative of a different academic discipline.

Bakhtin in Contexts Feb 28 2020 The Russian critic M. M. Bakhtin has recently become a major figure in contemporary theory beyond his traditional influence in Slavic literary studies. Bakhtin in Contexts explores the revolutionary impact Bakhtin's ideas have carried in contemporary discussion of language, art, culture, and social science in recent years. The contributors represent a broad range of disciplines in the humanities and social sciences, epitomizing the views of Russian and American specialists in those fields Bakhtin often referred to as "the human sciences." The diversity of perspective and flexibility of approach make this a unique contribution to Bakhtin studies and to the ongoing dialogue between Western and Russian theorists.

Academic Vocabulary in Middle and High School Sep 04 2020 In order to succeed in school and beyond, students in grades 6-12 need to understand and use both academic language and discipline-specific vocabulary. This book describes effective practices for integrating vocabulary study with instruction in English language arts, history/social studies, and math and science, and for helping students become independent, motivated word learners. The expert authors present a wealth of specific teaching strategies, illustrated with classroom vignettes and student work samples. Connections to the Common Core State Standards (CCSS) are highlighted throughout; an extensive annotated list of print and electronic resources enhances the book's utility.

Just-in-time Teaching Jun 13 2021 Just-in-Time Teaching (JiT) is a pedagogical approach that requires students to answer questions related to an upcoming class a few hours beforehand, using an online course management system. While the phrase 'Just in time' may evoke shades of slap-dash work and cut corners, JiT pedagogy is just the opposite. It helps students to view learning as a process that takes time, introspection, and persistence. Students who experience JiT come to class better prepared, and report that it helps to focus and organize their out-of-class studying. Their responses to JiT questions make gaps in their learning visible to the teacher prior to class, enabling him or her to address learning gaps while the material is still fresh in students' minds - hence the label 'just in time'. JiT questions differ from traditional homework problems in being designed, not only to build cognitive skills, but also to help students confront misconceptions, make connections to previous knowledge, and develop metacognitive thinking practices. Students consequently spend more time on course concepts and ideas, but also read their textbooks in ways that result in more effective and deeper learning. Starting the class with students' work also dramatically changes the classroom-learning environment, creating greater student engagement. This book demonstrates that JiT has broad appeal across the academy. Part I provides a broad overview of JiT, introducing the pedagogy and exploring various dimensions of its use without regard to discipline. Part II of the book demonstrates JiT's remarkable cross-disciplinary impact with examples of applications in physics, biology, the geosciences, economics, history, and the humanities.

Academic Vocabulary in Middle and High School Dec 08 2020 In order to succeed in school and beyond, students in grades 6-12 need to understand and use both academic language and discipline-specific vocabulary. This book describes effective practices for integrating vocabulary study with instruction in English language arts, history/social studies, and math and

science, and for helping students become independent, motivated word learners. The expert authors present a wealth of specific teaching strategies, illustrated with classroom vignettes and student work samples. Connections to the Common Core State Standards (CCSS) are highlighted throughout; an extensive annotated list of print and electronic resources enhances the book's utility.

Team Teaching Jun 01 2020 For those considering adopting team teaching, or interested in reviewing their own practice, this book offers an over-view of this pedagogy, its challenges and rewards, and a rich range of examples in which teachers present and reflect upon their approaches. The interaction of two teachers—both the intellectual interaction involved in the design of the course, and the pedagogical interaction in the teaching of the course—creates a dynamic environment that reflects the way scholars make meaning of the world. The process naturally breaks down the teacher-centered classroom by creating a scholarly community in which teachers and students work together to understand important ideas, and where students don't just learn content, but begin to understand how knowledge is constructed, grasp the connections between disciplines as well as their different perspectives, see greater coherence in the curriculum, and appreciate how having more than one teacher in the classroom leads naturally to dialogue and active learning. Each of the five examples in this book shares the story of a course at a different institution, and each is designed to reflect a number of different variables in team-taught courses. They represent courses in a variety of different disciplines, including the sciences, social sciences, humanities, and the arts; and at a range of levels, from first-year seminars to graduate courses. They also illustrate a number of different models for instructional teams, such as faculty from the same disciplines, from related disciplines, from two very different disciplines, from different institutions, and one pairing of a faculty member and a staff

member. This book provides insight into the impact of team teaching on student learning and on faculty development. It also addresses the challenges, both pedagogical and administrative, that need to be addressed for team teaching to be effective.

Academic English Aug 28 2022

Writing and Revising the Disciplines Mar 30 2020 This book's contributors explore key issues in the current state of their disciplines in light of crucial moments in each discipline's recent or longer-term history.

Research Across the Disciplines Jul 03 2020

Problem Solving Across the Disciplines Oct 06 2020 Suitable for Problem Solving courses throughout various disciplines, this book approaches problem-solving as an important subject, emphasizing problem-solving strategies that unify learning rather than compartmentalize it. It shows problem-solving strategies to relate to various disciplines.

Redefining Culture Jan 27 2020 *Redefining Culture: Perspectives Across the Disciplines* argues that culture is one of the most important factors we need to know when we interact as well as in our discussions of social problems and their solutions. This book picks up the dialogue where Kroeber and Kluckhohn left off in their classic 1952 collection and analysis of definitions of culture. As a resource for personal and academic libraries, this volume provides an updated listing of over 300 definitions of culture from a wide array of disciplines. Chapters examine how the definition of culture has changed historically, consider themes that cut across the definitions, and provide models for organizing approaches to defining culture. To round out this multi-disciplinary perspective, Renato Rosaldo provides a foreword, and prominent authors from six disciplines write about how they conceptualize culture and use it in their research and practice. This resource is an indispensable reference for scholars studying or integrating culture into their work. It will appeal to anyone interested in culture, particularly students and scholars in

anthropology, intercultural and international communication, cultural studies, cultural and social psychology, linguistics, sociology, family studies, political science, intergroup relations, cultural geography, and multicultural education.

Ricoeur Across the Disciplines Nov 18 2021 This multidisciplinary investigation facilitates a new conversation between Ricoeur scholars and those working in a variety of domains.

Game-based Learning Across the Disciplines Dec 20 2021 The volume focuses on epistemological, theoretical and empirical issues of game-based learning in various disciplines. It encompasses questions of game design as well as instructional integration and organizational implementation of game-based learning across various disciplines and includes contributions from different levels of the formal educational system (i.e., primary, secondary and tertiary education) as well as contributions reporting the use of game-based learning in informal learning settings. The volume addresses scholars, practitioners and students who are interested in how games and game-based learning can be designed, implemented and evaluated in a cross-, inter- and transdisciplinary perspective.

Genres Across the Disciplines Nov 30 2022 *Genres across the Disciplines* presents cutting edge, corpus-based research into student writing in higher education. *Genres across the Disciplines* is essential reading for those involved in syllabus and materials design for the development of writing in higher education, as well as for those investigating EAP. The book explores creativity and the use of metaphor as students work towards becoming experts in the genres of their discipline. Grounded in the British Academic Written English (BAWE) corpus, the text is rich with authentic examples of assignment tasks, macrostructures, concordances and keywords. Also available separately as a paperback.

The Essential Guide Sep 24 2019 Pocket-sized and inexpensive,
The Essential Guide to Writing Research Papers is the ultimate
brief research reference. Offers non-intimidating, step-by-step
instructions on all aspects of the research process. Explanations
of using the Internet discuss finding a topic as well as locating
resources. Introductions to the World Wide Web also cover using
search engines and directories, Gopher, FTPs, Telnet, listervs,
usenet newsgroups, and e-mail. Strategies for developing an
argument in a research paper are presented as well as
organizational paradigms for other common types of research
papers. Complete and up-to-date coverage of four documentation
systems-MLA, APA, CBE, and footnote style-also includes
coverage of electronic sources according to the latest guidelines.
A full chapter on selecting the best source material explains how
to evaluate both print and electronic sources. Comprehensive
section on avoiding plagiarism features a detailed discussion of
common knowledge. For those interested in a brief guide to
writing research papers.

Information Literacy Feb 07 2021 "Bringing together scholarship
and pedagogy from a multiple of perspectives and disciplines to
provide a broader and more complex understanding of
information literacy and suggests ways that teaching and library

faculty can work together to respond to the rapidly changing and dynamic information landscape"--Provided by publisher.

The Visual Turn Aug 23 2019 *The Visual Turn: South Asia Across the Disciplines* explores new perspectives made possible by the evidence drawn from visual culture. This evidence is utilized by historians, literary analysts, anthropologists and, in a new way, art historians. Focusing on built environments within their urban contexts; the interactions of buildings, roads, and bodies; the meaning-making achieved through consumption of images (on their own or in concert with literary texts) all contribute to a much broader and deeper understanding of change in South Asia. Juxtaposed, these case studies not only approach their topics in a multi-disciplinary manner, but also make clear just what scholars from various disciplines can learn from each other to add nuance and depth to their own analyses. In the process, the authors demonstrate how the application of different methods and theorizing, when coupled with a fascinating range of types of evidence, contribute to a significant broadening of our abilities to interpret the past and the present. In particular, these essays bring new ways of thinking about cities as well as the multiple ways that visual culture contributes to individual and collective forms of identity-narratives that are negotiated at key moments of change in South Asia. Readers will see their own materials and historicized contexts with new eyes. This book was published as a special issue of *South Asia: Journal of South Asian Studies*.

Across the Disciplines May 25 2022 *Across the Disciplines: Academic Reading and Writing* guides students through the essential skills needed to write effectively in any discipline - summary, paraphrase, introductions, conclusions, critical reading, synthesis, and research. The Anthology section provides a wide range of intriguing readings featuring articles from various disciplines in the humanities and social sciences.

Academic Writing - Third Edition Oct 30 2022 *Academic Writing* is a unique introduction to the subject. As the author puts it in her

preface, "this book develops from a strong claim: namely, that style is meaningful." In developing that theme, the author draws meaningfully on theory, especially genre theory, while remaining grounded in the particular. Giltrow presents and discusses examples of actual academic writing of the sort that students must learn to deal with daily, and to write themselves. As newcomers to the scholarly community, students can find that community's ways of reading and writing mysterious, unpredictable and intimidating. *Academic Writing* demystifies the scholarly genres, shedding light on their discursive conventions and on academic readers' expectations and values. Throughout, *Academic Writing* respects the student writer; it engages the reader's interest without ever condescending, and it avoids the arbitrary and the dogmatic. The book also offers abundant exercises to help the student develop techniques for working productively at each stage of the scholarly writing process; mastering and summarizing difficult scholarly sources; planning; and revising to create good working conditions for the reader. The third edition of Giltrow's extremely successful book incorporates extensive revisions that integrate the theoretical perspectives of genre theory into the whole of the book in a more organic fashion; the changes are designed to make the book both more attuned to scholarly practice and more accessible to the undergraduate student. Giltrow's *Academic Reading* is designed as an accompanying reader for *Academic Writing*.

Africanizing Knowledge Jan 09 2021 Nearly four decades ago, Terence Ranger questioned to what extent African history was actually African, and whether methods and concerns derived from Western historiography were really sufficient tools for researching and narrating African history. Despite a blossoming and branching out of Africanist scholarship in the last twenty years, that question is still haunting. The most prestigious locations for production of African studies are outside Africa itself, and scholars still seek a solution to this paradox. They

agree that the ideal solution would be a flowering of institutions of higher learning within Africa which would draw not only Africanist scholars, but also financial resources to the continent. While the focus of this volume is on historical knowledge, the effort to make African scholarship "more African" is fundamentally interdisciplinary. The essays in this volume employ several innovative methods in an effort to study Africa on its own terms. The book is divided into four parts. Part 1, "Africanizing African History," offers several diverse methods for bringing distinctly African modes of historical discourse to the foreground in academic historical research. Part 2, "African Creative Expression in Context," presents case studies of African art, literature, music, and poetry. It attempts to strip away the exotic or primitivist aura such topics often accumulate when presented in a foreign setting in order to illuminate the social, historical, and aesthetic contexts in which these works of art were originally produced. Part 3, "Writing about Colonialism," demonstrates that the study of imperialism in Africa remains a springboard for innovative work, which takes familiar ideas about Africa and considers them within new contexts. Part 4, "Scholars and Their Work," critically examines the process of African studies itself, including the roles of scholars in the production of knowledge about Africa. This timely and thoughtful volume will be of interest to African studies scholars and students who are concerned about the ways in which Africanist scholarship might become "more African."

Prototyping across the Disciplines Sep 16 2021 If people from different fields are going to work together on projects, then they need to begin to understand each other. They can be separated by the words they use, the ways they work and how they think. However, in many fields there is common ground, in the attempts to create what is sometimes called inventive knowledge. These fields progress not only by understanding increasingly more about what already exists, but by making guesses about possible

better futures. The guesses consist of small forays into that future, using strategies that are variously called learning through making, research through design or, more simply, prototyping. While traditionally associated primarily with industrial design, and more recently with software development, prototyping is now used as an important tool in areas ranging from materials engineering to landscape architecture to the digital humanities. This book collects current theories and methods of prototyping in a dozen disciplines, illustrating them through case studies of actual projects, whether in industry or the classroom. This edited collection aims to provide a context, a theoretical framework and a set of methodologies for interdisciplinary collaboration in design. Each chapter offers a different disciplinary perspective on prototyping, providing a case study as a point of comparison for identifying commonalities and divergences in current practices. Contributions are from a group of scholars with worldwide experience of working and presenting in design, and who are currently based in Canada, the United States, Chile and Brazil. This book isn't just about design across the disciplines, it is about how prototyping works in different disciplines. Prototyping is a crucial part of the design process, and a practice used by creators from all design disciplines, from architects and engineers, to industrial and service designers, to test a concept or process and evaluate an idea. Much research has been published on prototyping in design; what makes this new book unique is the cross disciplinary nature, showing designers how they can learn from various approaches to improve their skills. Disciplines discussed include post-human design, theatre, tabletop game design, landscape architecture and arts entrepreneurship. Primarily of interest to design scholars and practitioners with an interest in integrative design. Undergraduates and graduate students in design, HCI (human-computer interaction) and the digital humanities. Textbook potential.

Collaboration Across the Disciplines in Health Care Jul 15

2021 Invited esteemed professionals from public health, medicine, nursing, health services and administration, and other areas, present their diverse perspectives on collaboration across the spectrum of the health care fields in this interesting and timely text. With a 'student centered' approach (also known as 'learning-centered'), *Collaboration Across the Disciplines in Health Care* is accompanied by companion exercises, games and simulations, creating a thought-provoking learning experience. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

The Scholarship of Teaching and Learning In and Across the Disciplines Nov 06 2020 The scholarship of teaching and learning (SoTL) began primarily as a discipline-based movement, committed to exploring the signature pedagogical and learning styles of each discipline within higher education, with little exchange across disciplines. As the field has developed, new questions have arisen concerning cross-disciplinary comparison and learning in multidisciplinary settings This volume by a stellar group of experts provides a state-of-the-field review of recent SoTL scholarship within a range of disciplines and offers a stimulating discussion of critical issues related to interdisciplinarity in teaching, learning, and SoTL research.

Prototyping Across the Disciplines Aug 04 2020 Better Futures examines how prototyping plays a central role in design research when thinking about the future, across a host of disciplines. In so doing, it demonstrates theoretical and methodological transferability across disciplines not typically thought to be related to one another. Disciplines discussed include post-human design, theatre, tabletop game design, landscape architecture and arts entrepreneurship.

Academic Reading - Second Edition Feb 19 2022 This reader has been designed to accompany Giltrow's *Academic Writing*, one of the key principles of which is that there is a close connection

between the processes of reading and of writing academic prose. Each reading is preceded by introductory commentary, questions, and suggestions for discussion, and the book also includes a brief general introduction. As with Giltrow's *Academic Writing*, her *Academic Reading* is a challenging text. At its core are examples of actual academic writing of the sort that students must learn to deal with daily, and to write themselves. As newcomers to the scholarly community, students can find that community's ways of reading and writing mysterious, unpredictable and intimidating. *Academic Reading* demystifies the scholarly genres, shedding light on their discursive conventions. Throughout, *Academic Reading* respects the student writer; it engages the reader's interest without ever condescending, and it avoids entirely the arbitrary and the dogmatic. The second edition is expanded to include twenty-one selections, nineteen of which come from scholarly publications, and more than half of which are new to this edition.

Graduate Writing Across the Disciplines Jul 27 2022 In *Graduate Writing Across the Disciplines*, the editors and their colleagues argue that graduate education must include a wide range of writing support designed to identify writers' needs, teach writers through direct instruction, and support writers through programs such as writing centers, writing camps, and writing groups. The chapters in this collection demonstrate that attending to the needs of graduate writers requires multiple approaches and thoughtful attention to the distinctive contexts and resources of individual universities while remaining mindful of research on and across similar programs at other universities.

The Sword of Judith Apr 11 2021 The Book of Judith tells the story of a fictitious Jewish woman beheading the general of the most powerful imaginable army to free her people. The parabolic story was set as an example of how God will help the righteous. Judith's heroic action not only became a validating charter myth of Judaism itself but has also been appropriated by many Christian

and secular groupings, and has been an inspiration for numerous literary texts and works of art. It continues to exercise its power over artists, authors and academics and is becoming a major field of research in its own right. *The Sword of Judith* is the first multidisciplinary collection of essays to discuss representations of Judith throughout the centuries. It transforms our understanding across a wide range of disciplines. The collection includes new archival source studies, the translation of unpublished manuscripts, the translation of texts unavailable in English, and Judith images and music.

Redefining Culture Aug 16 2021 Argues that culture is perhaps the most important thing to know about people if one wants to make predictions about their behavior. The goal of this volume is to present a theoretically exhaustive integration of multidisciplinary approaches.

Academic Discourse Across Disciplines Dec 28 2019 This volume reflects the emerging interest in cross-disciplinary variation in both spoken and written academic English, exploring the conventions and modes of persuasion characteristic of different disciplines and which help define academic inquiry. This collection brings together chapters by applied linguists and EAP practitioners from seven different countries. The authors draw on various specialised spoken and written corpora to illustrate the notion of variation and to explore the concept of discipline and the different methodologies they use to investigate these corpora. The book also seeks to make explicit the valuable links that can be made between research into academic speech and writing as text, as process, and as social practice.

Perspectives on Contemporary Issues Nov 26 2019 This cross-disciplinary reader encourages critical thinking and academic writing by presenting students with a variety of perspectives on current issues from across the curriculum.

Across the Disciplines Sep 28 2022 *Across the Disciplines: Academic Reading and Writing* guides students through the

essential skills needed to write effectively in any discipline - summary, paraphrase, introductions, conclusions, critical reading, synthesis, and research. The Anthology section provides a wide range of intriguing readings featuring articles from various disciplines in the humanities and social sciences.

Research and Writing Jan 01 2023

Postcolonial Studies Across the Disciplines Oct 18 2021 Bringing together contributions from various disciplines and academic fields, this collection engages in interdisciplinary dialogue on postcolonial issues. Covering African, anglophone, Romance, and New-World themes, linguistic, literary, and cultural studies, and historiography, music, art history, and textile studies, the volume raises questions of (inter)disciplinarity, methodology, and entangled histories. The essays focus on the representation of slavery in the transatlantic world (the USA, Jamaica, Haiti, and the wider Caribbean, West Africa, and the UK). Drawing on a range of historical sources, material objects, and representations, they study Jamaican Creole, African masks, knitted objects, patchwork sculpture, newspapers, films, popular music, and literature of different genres from the Caribbean, West and South Africa, India, and Britain. At the same time, they reflect on theoretical problems such as intertextuality, intermediality, and cultural exchange, and explore intersections - postcolonial literature and transatlantic history; postcolonial and African-American studies; postcolonial literary and cultural studies. The final section keys in with the overall aim of challenging established disciplinary modes of knowledge production: exploring schools and universities as locations of postcolonial studies. Teachers investigate the possibilities and limits of their respective institutions and probe new ways of engaging with postcolonial concerns. With its integrative, interdisciplinary focus, this collection addresses readers interested in understanding how colonization and globalization have influenced societies and cultures around the world. Contributors: Anja Bandau, Sabine

Broeck, Sarah Fekadu, Matthias Galler, Janou Glencross, Jana Gohrisch, Ellen Grünkemeier, Jessica Hemmings, Jan Hüsgen, Johannes Salim Ismaiel-Wendt, Ursula Kluwick, Henning Marquardt, Dennis Mischke, Timo Müller, Mala Pandurang, Carl Plasa, Elinor Jane Pohl, Brigitte Reinwald, Steffen Runkel, Andrea Sand, Cecile Sandten, Frank Schulze-Engler, Melanie Ulz, Reinhold Wandel, Tim Watson Jana Gohrisch and Ellen Grünkemeier are based in the English Department of Leibniz University, Hannover (Germany), where they research and lecture in British studies with a focus on (postcolonial) literatures and cultures.

Diversity Across the Disciplines Apr 23 2022 Diversity research and scholarship has evolved over the past several decades and is now reaching a critical juncture. While the scholarship on diversity and inclusion has advanced within various disciplines and subdisciplines, there have been limited conversations and collaborations across distinct areas of research. Theories, paradigms, research models and methodologies have evolved but continue to remain locked within specific area, disciplines, or theoretical canons. This collaborative edited volume examines diversity across disciplines in higher education. Our book brings together contributions from the arts, sciences, and professional fields. In order to advance diversity and inclusion across campuses, multiple disciplinary perspectives need to be acknowledged and considered broadly. The current higher education climate necessitates multicultural and interdisciplinary collaboration. Global partnerships and technological advances require faculty, administrators, and graduate students to reach beyond their disciplinary focus to achieve successful programs and research projects. We need to become more familiar discussing diversity across disciplines. Our book investigates diversity across disciplines with attention to people, process, policies, and paradigms. The four thematic categories of people, process, policies, and paradigms describe

the multidisciplinary nature of diversity and topics relevant to faculty, administrators, and students in higher education. The framework provides a structure to understand the ways in which people are impacted by diversity and the complicated process of engaging with diversity in a variety of contexts. Policies draw attention to the dynamic nature of diversity across disciplines and paradigms presents models of diversity in research and education.

Graduate Attributes in Higher Education Jan 21 2022

Graduate Attributes in Higher Education illuminates the value of graduate attributes for students, graduates and lecturers in higher education. A coherent, intelligent, subtle and important enhancement to the field, this text guides readers through a theoretical and historical analysis of graduate attributes, using interdisciplinary and interprofessional lenses. This unique approach offers pertinent coverage of a wider range of graduate attributes than one usually sees, generating multiple perspectives and discourses that have implications for both theory and practice. Through an open and exploratory analysis, this text asks questions such as the following:

- Are programmes of study which claim 'postgraduate' attributes providing something further, deeper or enhanced in comparison, or just more of the same?
- Should we be developing continuing professional development attributes for our professional learning programmes of study, or are attributes of this nature established at the undergraduate level?
- How can we embed graduate attributes in curricula in a wide range of subject discipline-specific and interdisciplinary ways?
- In a culture of lifelong learning and a cross-disciplinary changing global market, are attributes simply a starting point - a launch pad for future and ongoing development required for a world of increasing complexity? Clearly structured and offering a mix of case study and theoretical frameworks to explore each GA, practical guidance is offered at the end of each chapter on how to embed the relevant graduate attribute whilst providing well-

researched theoretical underpinning. The varied methods applied and methodological attitudes espoused will prove inclusive to a wide range of readers. Bringing together analysis of specific case studies from a wide range of professional and discipline-specific contexts, Graduate Attributes in Higher Education will be a valuable text for educators and professionals focused on curriculum development and professional learning.

Key Concepts 2 May 01 2020 Key Concepts helps students master the academic content, academic vocabulary, and academic reading and writing skills they need to succeed at college.
