Children are naturally inquisitive and eager to explore and learn about the world around them. It is

important for their guardians, both Parents and Teachers, to satisfy their queries, and that too, in such a way that the children are able to understand and comprehend the concepts as well as learn from them. Also, there exists a gap in the level of information and knowledge provided to the children by the Parents vs. that provided by their Teachers. Discrepancies might also exist in the methodology(ies) through which the information and knowledge is relayed. This increases the possibility that the children might either not understand the concept clearly or become confused about the correct interpretation of the concepts. With these objectives in mind, and to build connectivity between the teaching methodologies by Parents and Teachers, we at Oswaal Books, have come up with this Manual for Teachers and Parents. Some benefits of using this manual are:

- It aims to aid the Teachers and Parents in simplifying the concepts studied by children as a part of their curriculum*
- It equips the parents and teachers to enable the children to understand the subjects, and also evaluate their measure of understanding and creativity.*
- It includes Learning and Understanding Aids along with a Lesson Plan for each Chapter*
- It demonstrates Effective Teaching Techniques*
- It also gives various Propositions for Step-wise Learning and Building up of Concepts*

IMPORTANT FEATURES OF THE BOOK: *Strictly based on latest NCERT Textbook The manual is based on the latest NCERT Textbook 6 Exploratory Learning objectives These provide explicit instructions to parents and teachers to teach their wards Effective Teaching Techniques The manual has tried and tested teaching techniques for higher success rate*

Experts. Accomplished teachers with 100+ years of combined
experience, Subject Matter Experts with unmatched subject
knowledge, dynamic educationists, professionals with a keen
interest in education This book focuses where assessment has
greatest relevance—the classroom. A great deal of research
related to assessment is focused on 'the testing industry', high-
stakes language proficiency testing, and related analytical and
statistical reports that are far removed from teachers' and
students' experiences in the classroom. Recently, more
attention has been paid to assessment in language classrooms
and the many challenges that teachers face in both measuring
and promoting student learning. This book contributes to the
body of knowledge related to teacher assessment competence,
and how it is manifested in the decisions they make about
assessment procedures and instruments in their classes.
Focused on specific challenges related to classroom assessment,
each chapter reports on particular assessment issues faced by
teachers, their choices regarding such issues, and the*

consequences (actual or anticipated) of their decision-making. This book will interest the thousands of teachers globally dealing with the numerous challenges associated with effective classroom assessment in language learning. This collection of teacher voices, stories, and investigations provides possible solutions to such challenges, and will serve to promote assessment literacy in the language teaching profession.

Diversity in African Languages contains a selection of revised papers from the 46th Annual Conference on African Linguistics, held at the University of Oregon. Most chapters focus on single languages, addressing diverse aspects of their phonology, morphology, semantics, syntax, information structure, or historical development. These chapters represent nine different genera: Mande, Gur, Kwa, Edoid, Bantu, Nilotic, Gumuzic, Cushitic, and Omotic. Other chapters investigate a mix of languages and families, moving from typological issues to sociolinguistic and inter-ethnic factors that affect language and accent switching. Some chapters are primarily descriptive, while others push forward the theoretical understanding of tone, semantic problems, discourse related structures, and other linguistic systems. The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists, as well as maturation of research on the family. The distribution of other papers highlights the need for intensified research into all the language families of Africa, including basic documentation, in order to comprehend linguistic diversities and convergences across the continent. In this regard, the chapter on Daats'i?in (Gumuzic) stands out as the first-ever published article on this hitherto unknown and

The contributions in this volume show— despite their diversity—a strong common denominator: an aim to bundle efforts and unify parameters in order to optimize English Language Teaching as a world-wide endeavor. Thus, for our teaching it can only be beneficial when linguists talk to literary-minded teachers or methodology specialists investigate whether their theoretical underpinnings make their way into practice by talking to language instructors or language service providers. In general, the authors present a multifaceted picture of the English Language Teaching context with themselves as practitioners but also as investigators and researchers at the same time. The research that reflects back on their teaching thus creates a force-feedback loop not only for the investigating scholar but also for the practicing instructor who reapplies his/her knowledge after failed or suboptimal attempts as evidenced by the data.
