Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures. Whether it's a motorhome, a caravan or a self-built camper van, this essential book will enable leisure vehicle owners to carry out their own comprehensive habitation checks to ensure that the living area of their caravan or motorhome is safe for themselves and other occupants. Seasoned leisure vehicle owners, complete novices who are new to the world of caravans and motorhomes, or self-build enthusiasts planning to start work on their first project will find this book to be an invaluable guide and constant companion. Following the detailed, well-illustrated instructions will ensure that problems and potential problems are identified early, not only saving money and unnecessary inconvenience, but also providing

essential information on how the different systems of a leisure vehicle function. Bearing in mind the cost of a professional habitation check, this book could save owners a lot of money! Compiled by a holder of the National Caravan Council (NCC) Motorhome Service Award, the book is divided into comprehensive sections, and covers checks and servicing advice on electrical systems, gas systems, water systems, test for water ingress (damp), ventilation, and much more ... Be smart: stay safe and save money, by performing your own caravan or motorhome habitation check. This sophisticated exhibition catalogue dedicated to the Berlin-based installation artist Thomas Zipp features vellum inserts, a fold-out poster and die-cut and hand-torn pages, giving it the precise feeling of actually walking through one of Zipp's famously sinister-seeming installations.
