An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

[American Cars in Prewar England](#) Sep 16 2021 After World War I, there was a great hunger for cars in Britain. Many servicemen had learned to drive and had money from their demobilization grants to spend, but British factories were not immediately able to get back into car production so they looked to America for automobiles. In 1919, two out of every five cars on British roads were Fords built in England, and in 1925, General Motors took over British manufacturer Vauxhall. Hudson also became a prolific assembler during this time and Chrysler built an assembly plant in Kew, west of London. This book features numerous photographs and commentary on many makes of American cars that could be seen on British roads before the beginning of World War II. Buick, Cadillac, Chevrolet, Chrysler, Dodge, Durant, Duryea, Essex, Ford, Hudson, Jewett, La Salle, Oldsmobile, Overland, Packard, Plymouth, Saxon, Stanley, Studebaker, Stutz and White are among the manufacturers whose cars are included. The author provides a concise

description of each automobile he covers, and points out some interesting features and technical details (horsepower and engine size, for example).

From Small Town to Downtown Aug 23 2019 The Jewett Car Company was born in the heyday of the electric railway boom in the 1890s. The company gained an excellent reputation for its elegant, well-built wooden cars for street railway companies, interurban lines, and rapid transit service. Cities large and small used Jewett cars, including New York, Boston, Chicago, and San Francisco. Many Jewett cars found their way to Indiana and many of the interurban lines employed the graceful, arch-windowed wood interurban that Jewett was famous for. Automobile competition and the problems of competing with much larger car builders, such as J.G. Brill and the St. Louis Car Company, signaled the beginning of the end. The company was offered the opportunity to produce munitions for World War I, but refused. The reason: the major source of finance for Jewett was a German nationalist banker from Wheeling, West Virginia, who refused to have the company do anything to harm Germany. As a direct result of that action, the Jewett Car Company failed.
