Configuring Citrix Metaframe for Windows 2000 Terminal Services Nov 27 2019 Configuring Citrix Metaframe for Windows 2000 Terminal Services describes all the means in using both Microsoft Windows 2000 Terminal Services and Citrix MetaFrame in an environment. The book specifically covers ways on designing the infrastructure, implementing the plan, troubleshooting the deployment, and configuring servers and clients. The text also explains the process of deploying applications over the Internet, monitoring end users, and securing applications and data. The book also directs how to improve applications' performance with thin clients.

The Essential Guide to Computer Data Storage Jul 16 2021 Explores recent innovations in information and data storage technology.

Hector Jan 28 2020 This volume and volume II HECTOR - Basic Projects present the results of HECTOR, the four-year cooperation from 1984-1988 between the University of Karlsruhe and IBM Germany. The HECTOR Project has two major aspects: the first is to explore new ways in university education. The associated projects are presented in this volume. It includes a survey of the objectives of the cooperation project, its organization and the experience of the project management. Experience in student education using data processing equipment and particularly personnel computers is presented, e.g. distribution of software, introduction of standards and coordination of the activities in the different institutes. The second aspect of HECTOR, i.e. research work, results and experiences of the installation of the prototype of a heterogeneous computer network in a university, is presented in volume II.

Windows User's Guide to DOS Sep 29 2022 Carolyn Gillay and Bette Peat have teamed up again to write the Windows 2000 Professional version of their runaway bestseller Windows User's Guide to DOS. Like its predecessor, this book is aimed at the student who has had little or no experience in working with a computer at the operating system level. It is suitable for a three- credit, 16-week, semester-length course.

Guide to Computer Viruses May 02 2020 For those who didn't buy the first edition, welcome aboard. For those who did buy the first edition, welcome back, and thanks for making the second edition possible. For those who bought the first edition and are standing in the book store wondering whether to buy the second, what's in it for you? Well, for one thing, it's smaller. (No, no! Don't leave!) I tried to make the first edition a kind of master reference for antiviral protection. That meant I included a lot of stuff that I thought might possibly be helpful, even if I had some doubts about it. This time I've tried to be a little more selective. I've added a little more material to Chapter 4 (Computer Operations and Viral Operations) dealing with the question of computer viruses infecting data files and the new "macro" viruses. I've added two new sections to Chapter 7 (The Virus and Society). One looks at the increasing problem of false alarms while the other looks at the ethics of virus writing and exchange.

Global Ecosystems Database, Version 1.0 (on CD-ROM) Jun 14 2021 "The US Environmental Protection Agency (EPA), Environmental Research Laboratory - Corvallis, Oregon (ERL-C), established an Interagency Agreement with the US National Oceanic and Atmospheric Administration (NOAA), National Geophysical Data Center (NGDC) in September 1990. This agreement began a five year cooperative effort to develop a geographic database for modeling terrestrial climatebiosphere interactions in support of EPA's Global Climate Research Program. Although performing specific tasks under contract to the US EPA, NGDC independently operates a Global Change Database Program (GCDP) as part of its NOAA mission. Considerable synergism therefore exists between the tasks performed for the JPA under the "Global Ecosystems Database Project," and other activities supporting NOAA Climate and Global Change Program"--Preface.
